

ABSTRACT

The present invention relates to an algal adduct of the
 5 citrullinylarginine natural dipeptide as well as to its
 dermatological use and the use of chemical analogs issued from
 the same dipeptide displaying no toxic potential, as skin and
 phanera care and treatment agents, the said analogs having the
 following general formula (I) :

in which :

- R₁ represents an acyl or acycloxy radical,
- 15 - R₂ represents a hydroxyl, amine, alkylamine or alcoxy radical,
- R₃ represents a hydrogen atom or a hydroxyl radical.
